

Fulcana

Maize

Fulcana is an exciting new variety that has just completed variety listing and will be commercially available in 2027.

It excelled during its 2 years in VL trials in both DM yield and quality.

It is a promising dual purpose variety well positioned for both forage and AD.

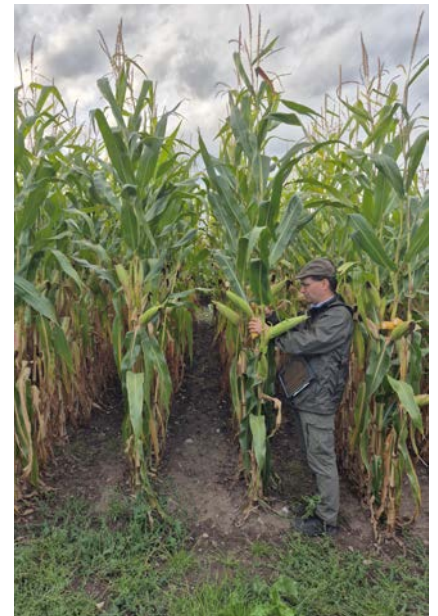

It produces a large well formed cob with flint/dent kernels.

- ➔ **Fulcana is a new high performing dual purpose variety.**
- ➔ **Fulcana has consistent high DM yields in official VL trials and private trials.**
- ➔ **Fulcana has excellent quality with a large well formed flint/dent cob.**
- ➔ **Fulcana has good early vigour and stands well for a reliable harvest.**
