

SU Karlsson is a standout Biogas variety with proven performance over a number of years.

It excels in the north where it gets to AD harvest quicker than other lines. In trials it is the quickest and earliest of all hybrid rye varieties.

A true dual purpose variety with outstanding biogas performance and excellent grain quality.

SU Karlsson has the strongest straw rating in the official table.

- ➔ SU Karlsson has outstanding gas yield and AD performance.
- ➔ SU Karlsson has excellent straw quality, lowest lodging rating in the official table.
- ➔ SU Karlsson has very quick early spring growth.
- ➔ SU Karlsson has the strongest brown rust rating in the official table.
