

SU Perspectiv

WINTER HYBRID RYE

SU Perspectiv is a high yielding dual purpose variety which has shown exceptional grain quality and is now an important variety for Ryvita.

In trials it has performed well throughout the UK but has excelled in the north.

It has rapid spring growth which increases biomass but also keeps growing well into the season.

It has a robust agronomic package with improvements in straw and disease ratings over older varieties.

- ➔ **SU Perspectiv is a high yielding dual purpose variety for grain and AD production.**
- ➔ **SU Perspectiv is quick to establish with rapid spring growth.**
- ➔ **SU Perspectiv is a strong strawed variety with excellent standing.**
- ➔ **SU Perspectiv works well in all regions but excels in the north.**
